Application Development and Management Services

Customized Application Development and Management (ADM) services ensure that applications perform optimally at minimal cost.

ExcelGens leverages proven methodologies, innovative technologies, and a flexible delivery model to create customized solutions for our customers. Unlike off-the-shelf products, custom solutions are built to exactly match and support customers' unique business processes for maximum efficiency.

ExcelGens' Application Development and Management services produce and support high-quality custom solutions in minimum turnaround time, at reduced costs providing a greater return on investment (ROI). Our technology specialists have proven experience of building complex software projects across all industry using standard development methodologies.

We bring mature processes, proven tools and certified experts to ensure superior quality, performance and productivity. Our portfolio of application development and management services cover full spectrum of software development lifecycle including assessment to solution design, development, implementation, and support/management. ExcelGens' flexible onsite-offsite-offshore delivery model coupled with industry's best practices provide "High Quality – High ROI" solutions for our customers.

Business Benefits

- End-to-end portfolio of Applications and Management solutions which are integrated into businesses of enterprises
- Domain and technology efficiencies based on specialists addressing company needs
- Methodologies to successfully build and manage applications, leading to better cost efficiencies and streamlined processes

End-to-end Application Development and Management Services

Our application development and management services expertise extend across requirement analysis and implementation to post implementation support and maintenance services for key industry verticals such as banks, financial services institutes, hedge funds, retirement services, telecommunication, healthcare, and pharmaceutical players. We help our clients effectively manage their mission critical applications by providing cost-effective services across a wide range of technology platforms.

Services We Offer

- Architecture Strategy and Design
- Application Development and System Integration
- Quality Assurance and Testing
- Application Management and Support

Architecture Strategy and Design

ExcelGens offers mature application development processes, tools, and methodologies and comprehensive verification and validation procedures to ensure delivery of high quality applications perfectly engineered to help each client effectively meet their business objectives.

Application Development and System Integration

At ExcelGens, we strive to realize better returns on your investments, improve organizational productivity and quicken responsiveness to change by helping you realize the full potential of your enterprise application portfolio through our application integration services.

Quality Assurance and Testing

Our testing services help organizations to significantly reduce or eliminate issues related to functionality, performance, quality, and reliability. We provide systematic software quality assurance services as well as domain specific testing frameworks.

Application Management and Support

Our proven SLA based support services ensure effective application support while reducing the total cost of application maintenance. Our constant endeavor is to provide high quality support and maintenance services by continually improving service quality.

About ExcelGens
